

DEPARTMENT INFORMATION – SCIENCE TEACHER (maternity cover)

The Science Department

Stratford upon Avon School's Science department has a history of being one of the strengths of this school and has a proven record of consistent high standards in the classroom, high achievement in public examinations. The Team is forward-thinking and innovative, colleagues are encouraged to collaboratively develop and drive the department forward. We have strong working relationships and a supportive environment.

Curriculum

The science department uses collaboratively designed schemes of learning and common resources form a starting point for individualising lessons. We are continuously striving to review and build upon our curriculum delivery and student experience.

You will be expected to have, or be developing, a strong grasp of curriculum related issues in order to help shape our future direction.

The Curriculum Leader for Science is currently supported by Heads of Chemistry and Physics and KS4 & KS3 coordinators. The Science Leadership oversee the schemes of learning, assessment and support teaching staff to develop their pedagogy to best secure student progress.

KS3 students follow the National Program of Study with a newly developed and well-resourced Scheme of Learning. These support students to acquire scientific knowledge and develop practical skills to allow them to progress to the new GCSE specifications. Assessment at KS3 is conducted by regular low-stakes assessment in class and half-termly progress tests.

At KS4 students follow the AQA GCSE courses. Around 20% of our KS4 cohort take three separate sciences to GCSE with the remainder examined in the Trilogy Combined Science course. Our teachers follow the well-resourced schemes of learning which incorporate subject content, practical and mathematical skills throughout the course. Assessment is via regular Knowledge Checks, marking of exam questions to develop exam technique, and end of topic tests that separately assess AO1, 2 and 3 skills.

Biology (AQA), Chemistry (OCR) and Physics (AQA) are taught at A Level, along with Applied Science (AQA) and these courses are a particular strength of the department. KS5 students have 10 hours of contact per subject allowing us to explore topics in greater breadth and to take time to fulfil the practical requirements of the course with greater depth.

Staff

The Science team is positive, friendly and forward looking and many members of the department take a leading role in whole school development. All of these strengthen the bond between staff and students and help to make the department an enjoyable and fulfilling place to work.

There are seventeen experienced and able specialists involved in the delivery of the Science curriculum. The Science department enjoys the invaluable support from an excellent technician team and a dedicated Teaching Assistant to facilitate student progress.

Members of the department make full use of the opportunity to attend appropriate courses at local and national level. We work closely with local ITT providers and offer our full support to colleagues wishing to pursue their studies at Certificate, Diploma and Masters Level. We also have a good track record of

supporting NQTs through induction via our departmental training program, regular mentoring with an assigned member of the team running alongside the whole school program.

Staff within the department run a number of extracurricular activities to complement learning in lessons. Trips and visiting presenters are arranged throughout the year for all Key Stages and we celebrate National Science week with events and demonstrations.

The Facilities

The department is well equipped, having eleven well-resourced laboratories, two preparation rooms and a staff resource base. A wealth of equipment allows practical activities to take place regularly within lessons. There may well be additional developments in future as we are in the process of developing/expanding our site due to our increasing popularity and increased admissions applications.

This is certainly an exciting time to join a successful well-resourced, growing school.

Conclusion

We are looking to strengthen our team by employing a Science specialist with a strong passion for their subject. The ability to teach Science at all Key Stages would be advantageous.

We look forward to welcoming a well-qualified colleague who will bring enthusiasm and ambition to work with us to build on established strengths and contribute to the continuing success of the department and school.

This is an exciting opportunity for the right person to develop their career. I look forward to receiving your application.

Mr Andrew Porter, Curriculum Leader Science/Head of Biology
